- REACT BOOTCAMP (ETERATION - 2022)
- FRONTEND WEB DEVELOPMENT (PATIKA - 2022)
- HTML5 - CSS3 (UDEMY - 2021)

ABOUT ME

I have been involved in both teamwork and individual roles in the projects I have contributed to. During this process, I worked with Agile methodology. I was eligible to participate in the Bootcamp on web development and successfully completed it. I am currently following training programs on Frontend development. I follow the updates to the libraries and tools I have used and I read the related articles. I also regularly review projects via Github to write cleaner code and learn different usage patterns.

WORK EXPERIENCE
